

# In the Garden

Our theme for this half term is all about different British animals. We will be exploring different pets and local British Wildlife. We would love to see the children exploring this theme at home. Here are some ideas of how you can join in.

- If you have a pet at home, write a fact file all about it. What is its name? What type of pet is it? How do you look after it? If you do not have a pet what would your dream pet be?

- Design a funny pet home, does it have a floating doggy pool or a canary disco?

- Go for a winter walk in a local woods, can you see any evidence of wildlife? Are there Robins cheeping? Can you see squirrels in the trees?

- Make a bird feeder to keep them fed in these wintery months.

- Grow your own cress at home. You can easily grow them in egg shells and make funny egg people.

- Create your own subtraction and addition problems using bigger numbers up to 40.

- Measure the different lengths of items around your house.

**We cannot wait to see all your lovely work on Seesaw.**
